

TAWSIF HAQUE

Software Engineer

SUMMARY

Creative, detail-oriented, software developer with a deep interest in ML & AI. Proven track record of creating and implementing successful frontend and backend web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at Genesys Softwares LLC

June 2022 — Present

- Collaborated with a team of developers and designers using agile to build modern and responsive web applications and websites
- Maintain communication with clients to help navigate their project and deliver on deadlines
- Worked on full-stack web apps (in-house and shopify) implement functionalities and integrate REST APIs
- E-commerce websites and webapps with Shopify's APIs

Software Engineer at #100Devs, Los Angeles, CA

October 2020 — May 2022

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

AI Designs: (Full-stack Web App): Users can enter a prompt text, and get back AI generated art. Those generated arts can be selected to add to a shopify product (canvas and/or poster) which can then be sold as a real product. This was created using NextJS and TailwindCSS for the frontend and NestJS and MongoDB for the backend.

House Marketplace (Full-stack Web App) – Users can create, update and delete their listings up for sale or rent. Other users can view those listings and contact the landlord through email. Single Page Application built with React and Firebase (database and authentication).

Project Management (Full-stack Web App) – Users can login to their profile and find a dashboard of the current projects and the members assigned. Members can comment on the project they are assigned to. Only the project owner can create a project, add members and set a deadline. A single-page web app built with Firebase for backend, focusing more on the react frontend.

Other Projects: Daily Motivation Quotes for Champions with tweet functionality, StarGazers Society APOD Web App with NASA API integration, On Demand Weather Information based on location with weather API integration, Finance Tracker App to help you remember those transactions and many others.
